HW Commission – IP Consortium Update

Thank you for your support of a virtual synchronous statewide interprofessional education experience.

- The statewide interprofessional education virtual learning experience will occur on Tuesday, March 28, 2023 from 9:30am-11:00am.
- The topic is mitigating Health Misinformation related to vaping/smoking. The planning committee has 2 meetings scheduled in January 2023 to develop the case and respective student resources.
- We are asking for all interested programs to complete a survey by January 2023, so the planning committee can proceed with logistics.
- The contract between the Board of Regents Health Works Commission and LSU Health Sciences Center New Orleans for financial support of contracted services is being routed for a final signature.

Through the Interprofessional Consortium, we are able to promote national and international engagement opportunities across the state. An email was sent to Consortium members about the opportunity to apply to become an abstract reviewer for a North American conference, Collaborating Across Borders VIII.

- 5 Louisiana institutions are represented as abstract reviewers, where 1 was represented in prior years.

In January 2023, the Interprofessional Consortium leadership will meet with leadership from the Simulation Council to discuss opportunities to collaborate in the future.
