LSUHSC-NO Senate Resolution: Electronic Application and Course Records

Whereas LSUHSC-NO requires application for admission, registration for courses, and filing of final grades by paper forms, which then require manual entry into institutional databases;

Whereas these processes are slow, labor-intensive, and subject to error;

Whereas these processes are handled electronically and online at other educational institutions, including many in Louisiana;

Whereas the present forms of these processes create the impression among applicants, faculty, and others who encounter them that our processes are not state-of-the-art;

Be it resolved that the LSUHSC-NO Faculty Senate unanimously recommends the immediate implementation of modern, electronic, internet-based processes for application for admission, registration, class rosters, and filing grades.
